GalaxyNG is a strategic PBE (Play by E-Mail) game of space exploration and conquest. There are multiple GalaxyNG Servers and variants available around the world. Go to the GalaxyNG Home Page to learn about the available Game Servers

WOMBAT Game Server is a GalaxyNG Game Server that runs in a Microsoft Windows environment. It processes incoming e-mails automatically, replying to all e-mails that have a subject that it understands. All other e-mails are ignored.

To learn about what e-mail commands are available on the WOMBAT Games Server just send an e-mail as follows and you will be sent a reply with the details.

To: wombat@mykoala.net
Subject: help

If you are interested in learning to play GalaxyNG. There are instructions on the GalaxyNG Forum to practice with a turn processor. [Click Here For Details](#)
